### LIFE CHIROPRACTIC COLLEGE WEST RECEIVES STATE-OF-THE-ART DONATION

**Hayward, Calif., June 30, 2009** — The Benesh Corporation of Monroe, Mich., recently donated a Benesh Anatometer II Plus unit to Life Chiropractic College West. The Anatometer is a sophisticated screening and diagnostic tool to show postural distortion in the body. Dale Johnson, Ph.D., Life West's director of research, called the donation a welcome addition to Life West's resources for the college's research and clinical programs.

The state-of-the-art equipment comprises a sophisticated scale that gathers, analyzes, records and displays patient weight and posture data.

Dr. Johnson said that the Anatometer II Plus would assist in the skills development of Life West chiropractic interns employing the National Upper Cervical Chiropractic Association (NUCCA) technique, and it would also be used in support of Life West's research efforts.

The donation was arranged by the Benesh Corporation through the efforts of Dr. Johnson and the Upper Cervical Research Foundation (UCRF).

Life West, established in 1976, is an accredited non-profit institution of higher learning. Currently over 400 students from across the United States and abroad are enrolled, and over 3,700 graduates of Life West are now providing chiropractic care worldwide. The college's Health Center, a public outpatient facility staffed by approximately 150 senior interns who are guided by licensed doctors of chiropractic, provides affordable health care to more than 1,500 patients per week in the city of Hayward, California. The college and Health Center maintain a Web site at [www.lifewest.edu](http://www.lifewest.edu).
