UC BERKELEY EXTENSION BEGINS TO OFFER ANATOMY LAB COURSES AT LIFE WEST

HAYWARD, Calif, September 16, 2009 – On September 3, the University of California Berkeley Post-Baccalaureate Health Professions Program started using the anatomy facilities at Life Chiropractic College West for its Human Anatomy Laboratory course.

Dr. Joseph Ferguson, Life West's Dean of the College, said, "We are excited to work with such a prestigious program as UC Berkeley Extension. By offering exceptional facilities and ample support and cooperation, we aim to create a productive environment for their students to excel. It is our hope to build upon this relationship and offer additional classes over time."

As UC Berkeley Extension began expanding its programs into both East and South Bay regions, the university sought local facilities to accommodate its anatomy students. Easy access to both Highway 92 and I-880 freeways, along with ample parking, were valuable features making Life West an attractive choice. Future courses will be scheduled during evening and/or weekend hours when Life West classes are not in session.

Established in 1976, Life West is an accredited non-profit institution of higher learning. Currently over 400 students from across the United States and abroad are enrolled, and over 3,700 graduates of Life West are now providing chiropractic care worldwide. The college's Health Center, a public outpatient facility, staffed by approximately 150 senior interns who are guided by licensed doctors of chiropractic, provides affordable health care to more than 1,500 patients per week in the city of Hayward, California. The college and Health Center maintain a Web site at www.lifewest.edu.
